DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a pharmaceutical composition comprising a host-rotaxane.

Group II, claim(s) 19-27, drawn to method of delivering a composition to a subject.

Group III, claim(s) 28-30, drawn to a method of treating cancerous cells in a subject.

Group IV, claim(s) 31-34, drawn to a method of diagnosing cancerous cells in an individual.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The groups do not share coextensive technical features. The technical feature of invention I is a composition, of invention II is a method of delivering that composition, of invention III is a method of treating cancerous cells, and of invention IV is a method of diagnosing cancerous cells.

Further, inventions II-IV do not share coextensive technical features because each of the inventions represent separate methods that are characterized by different steps, different products and have different modes of operation.
